## **Kaohsiung Municipal Kai-Syuan Psychiatric Hospital**

Kai-Syuan Psychiatric hospital is accreditation as a psychiatric teaching hospital by the Ministry of Education and Ministry of Health and Welfare and the meanwhile is appointed as the core psychiatric hospital in the Kaohsiung Metropolitan Area. Besides the implementation of the National Mental Health policy, the promotion of the Community Rehabilitations/activities and the propagation of mental health are always the efforts and the targets to be pursued.

Through the comprehensive psychiatric services systems, we can promote the mental health for the citizens. If the psychiatric symptoms can be detected the early stage and psychiatric intervention (include earlier rehabilitation), we promise to provide the citizens with complete mental health care.

## **Tsaotun Psychiatric Center, MoHW**

Tsaotun Psychiatric Center was founded on July 15, 1983. Before then, mental health resources were scarce in central Taiwan and the need for mental health services was tremendously increasing due to improving physical wellbeing of Taiwanese people.

Initially, Tsaotun Psychiatric Center was equipped with 550 inpatient beds (including 50 beds for substance abuse patient). With the growing demand for hospitalization, TTPC has further expanded the inpatient unit up to 197 acute beds, 800 chronic beds and 92 psychiatric nursing home beds.

Being the only public mental hospital in central Taiwan in the past decades, TTPC had the mission to provide long-term care for the disadvantaged psychotic patients without family support. TTPC also provides 227 government-funded residential beds for those in need of service in the western part of Taiwan.

Community psychiatry is one of the essential services in TTPC. There are 160 day care and 195 day-time psychiatric rehabilitation beds, and 40 residential psychiatric rehabilitation beds.

We also have innovative "Spring Breeze Project" which professional teams were assigned to every catchment areas of whole Nantou county and Da-li in southern Taichung to provide clinical services and intense connection with public health agencies and private sectors.

We are also proud to have establish a renowned Substance Abuse Therapeutic Community, named Jia-Lao Village, which can accommodate 30 residents who dependent on various kinds of substance, ranging from Heroin, amphetamine, ketamine, BZD and even alcohol. This only one medical model of TC in Taiwan had been set up 10 years ago and attracted numerous healthcare professionals, policy makers, government officials, NGOs and even university students to visit.

Those facilities together make TTPC the largest mental hospital providing most comprehensive treatment models in central Taiwan.

## Taoyuan Psychiatric Center, MoHW

Taoyuan Psychiatric Center (TYPC) is the earliest established psychiatric institute in Taiwan. Its predecessor – Yoseiin, was founded in 1934 by Taiwan Sotofuku as the first public mental hospital in Taiwan. With its continuous renovation, TYPC is now one of the largest psychiatric hospitals in Taiwan, with missions of psychiatric services, clinical training and research. It has 1,111 psychiatric beds, more than 10,000 outpatient visits per month, 30 board-certified psychiatrists and 500 staff members. In terms of clinical service, TYPC provides comprehensive care to various kinds of psychiatric patients, including adult psychiatry (general psychiatry), child and adolescent psychiatry, geriatric psychiatry, community psychiatry, addiction and forensic psychiatry, and psychosomatic medicine. TYPC is ranked as an excellent class in Taiwan Joint Commission on Hospital Accreditation, and provides specialty training of board-certification psychiatrist, as well as subspecialty training opportunities including Child/ Adolescent Psychiatry, and Geriatric Psychiatry. With more than 30 board-certified psychiatrists, TYPC is capable of providing training for psychiatric nurses, clinical psychologists, occupational therapists, and pharmacists. The high quality clinical services of TYPC are also recognized by accreditation of “Symbol of National Quality awards” by Institute for Biotechnology and Medicine Industry in Taiwan.

The featured teaching and training programs of TYPC includes the followings:

1. Comprehensive psychiatric care model: In TYPC, the psychiatric care includes all that a patient with severe-mental-illness (SMI) needs, such as outpatient service (OPD), acute ward, rehabilitation ward, community rehabilitation center, home care program, halfway house, adult day care unit, child/ adolescent day care unit, geriatric acute ward, and Northern Taiwan Addiction Treatment Demonstration Center.
2. Evidence-based clinical training courses with clinical research: weekly research literature reading of updated peer-reviewed medical journals were the base of clinical practice and clinical research, and more than 10 active intramural and sponsored research projects are undergoing in TYPC. The staff psychiatrists are also experienced in scientific writing of research articles.
3. Young and energetic staffs engaged in clinical training, with cross-discipline training programs in TYPC, which is very helpful for training of System-based practice in psychiatry.

## **Bali Psychiatric Center, MoHW**

Bali Psychiatric Center is a core hospital responsible to psychiatric center district network, and was approved as teaching hospital integrating technology, humanity, and international characteristic in northern Taiwan. It provides service for the people with diverse mental illness. Bali Psychiatric Center is equipped with a complete team to conduct psychiatric assessments for the patients, its innovative service model that cover full range of mental illness to provide medical services including emergency care, acute hospitalization and community rehabilitation program. It engages with the community service network to promote mental health of population actively. It also join the local government and connect civil organizations to set up outpatient clinics in Tucheng and Luzhou Distract, in addition, there are many daytime and full-time community rehabilitation centers to implement recovery orientated program for the people with mental illness. The screening of mental illness, education are mental health counseling to enhance mental health of population are our major task.
